

# CONFIDENCE INDEX

# 39.6

+2.7

September 2021

The HousingIQ/Kentucky REALTORS® Confidence Index is a composite measure that captures Kentucky REALTOR® expectations about the housing market over the next twelve months. It is derived from three sub-indices – Price Expectation Index, Buyer Power Index, and Homeowner Stress Index. A value of 50 corresponds to respondents anticipating no change in market conditions over the next twelve months. A value of 100 corresponds to all respondents agreeing that market conditions will improve.

49% of respondents expect higher sales volume in the next twelve months.

↑ +5

## ABOUT THE HOUSINGIQ SURVEY OF KENTUCKY REALTORS®

Developed and administered by HousingIQ, the Survey of REALTORS® is designed to systematically harness the ears-to-the-ground local market knowledge of REALTORS® and create new insights about the housing market. The survey consists of semantic differential questions concerning realtor expectations of house prices, sales, homeowner stress, and buyer demographics. The responses provide three distinct forward-looking measures—Price Expectation Index, Buyer Power Index, and the Homeowner Stress Index. A headline Confidence Index is obtained by summarizing the three measures to reflect the prevailing expertise and wisdom of REALTORS®.
